Sex: Male

Date Of Study: Wed, 24 Oct 2018

Pulse: N/A **Resp.:** N/A

No call was requested

Pertinent Case Information*

OFA results came back with possibility of transitional vertebrae

Differential Diagnosis*

checking for transitional vertebrae

Findings:

This report describes evaluation of two view orthogonal radiographs of the thoracolumbar vertebral column and pelvis. Five radiographs are available for review. No substantial abnormality is detected.

Assessment:

1. Clinically normal radiographs of the thoracolumbar vertebral column and pelvis

Discussion:

Congenital vertebral anomalies are not detected.
