**Patient Information**

Client: White, Jennifer Patient Name: DN53626206 Perris Vom Wasserrand Reg. Name: PERRIS VOM WASSERRAND PennHIP Num: 122629 Species: Canine Date of Birth: 11 May 2018 Sex: Female Date of Study: 28 Sep 2018 Date of Report: 28 Sep 2018	Tattoo Num: Patient ID: 20849AP Registration Num: DN53626206 Microchip Num: Breed: GERMAN SHEPHERD Age: 20 weeks Weight: 27.4 lbs/12.4 kgs Date Submitted: 28 Sep 2018
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

**Findings**

Distraction Index (DI): Right DI = 0.31, Left DI = 0.29.  
 Osteoarthritis (OA): **No radiographic evidence of OA for either hip.**  
 Cavitation/Other Findings: No cavitation present.

**Interpretation**

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.31.  
 OA Risk Category: The DI is between 0.31 and 0.49. This patient is at mild risk for hip OA.  
 Distraction Index Chart:

**BREED STATISTICS:** This interpretation is based on a cross-section of 14707 canine patients of the GERMAN SHEPHERD breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.25 - 0.69) for the breed. The breed average DI is 0.42 (solid square). The patient DI is the solid circle (0.31).

**SUMMARY:** The degree of laxity (DI = 0.31) falls within the central 90% range of DIs for the breed. This amount of hip laxity places the hip at a mild risk to develop hip OA. **No radiographic evidence of OA for either hip.**
