

PennHIP Report

Referring Veterinarian: Dr Dave Cloutier	Clinic Name: Veazie Veterinary Clinic
Email: veazievvet@veazievvet.com	Clinic Address: 1522 State St.
	Veazie, ME 04401
	Phone: (207) 941-8840
	Fax: (207) 942-5317

Patient Information

Client: White, Jennifer	Tattoo Num:
Patient Name: Asia Vom Seelenvoll	Patient ID: 20849BW
Reg. Name: Asia vom Seelenvoll	Registration Num: DN60618502
PennHIP Num: 141346	Microchip Num: 985112011672472
Species: Canine	Breed: GERMAN SHEPHERD
Date of Birth: 20 Dec 2019	Age: 16 weeks
Sex: Female	Weight: 27 lbs/12.2 kgs
Date of Study: 15 Apr 2020	Date Submitted: 15 Apr 2020
Date of Report: 16 Apr 2020	

Findings

Distraction Index (DI): Right DI = 0.30, Left DI = 0.23.
 Osteoarthritis (OA): **No radiographic evidence of OA for either hip.**
 Cavitation/Other Findings: No cavitation present.

Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.30.

OA Risk Category: The DI is less than or equal to 0.30. This patient is at minimal risk for hip OA.

Distraction Index Chart:

BREED STATISTICS: This interpretation is based on a cross-section of 16081 canine patients of the GERMAN SHEPHERD breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.24 - 0.68) for the breed. The breed average DI is 0.42 (solid square). The patient DI is the solid circle (0.30).

SUMMARY: The degree of laxity (DI = 0.30) falls within the central 90% range of DIs for the breed. This amount of hip laxity places hip at a minimal risk to develop hip OA. **No radiographic evidence of OA for either hip.**

INTERPRETATION AND RECOMMENDATIONS: No OA/Minimal Risk: Unlikely to show radiographic evidence of hip OA; even more unlikely to develop clinical signs of hip dysplasia. **Recommendations:** Normal to strenuous activity is permitted. Keep lean: try to maintain BCS at 5/9 for a longer and healthier life.

Breeding Recommendations: Please Consult the PennHIP Manual.
